

Beauty at Van Vleck February 25th

Bark is beautiful! Come enjoy the variety offered by *Betula jaquemontii* (Himalayan birch), *Acer griseum* (paperbark maple), and *Pinus bungeana* (lacebark pine).

Highlight of the week: Yes, there are some flowers out there! Check out our assortment of *Hamamelis* (witch hazel) in the woodland. *Winter aconites* (*Eranthis hyemalis*) are starting to emerge in the courtyard.

Don't forget twigs! Eye-popping color from *Cornus sanguinea* 'Winter Flame' (redtwig dogwood).

Scientific Name	Common Name	Where?	Fragrant?			
-----------------	-------------	--------	-----------	--	--	--

Trees: no flowers right now-- look for foliage, fruit, and bark interest
